

elastomero inferiori/bassi conici

The cushions are a fundamental part of the skates and must be always maintained for a maximum state of efficiency. The cushions for the Matrix frame are specific to this model. Made with elastomer, they provide a quick and fluid responsiveness that permits a correct execution of edges. Constituted of an upper part (larger), and a lower part (smaller). The upper cushion for the Matrix has a lowered profile which offers a better center of gravity, providing better precision and balance. Available in 5 hardnesses (colors). Available in kits of 4 pieces (4 top or 4 bottom). (It is at the discretion of each reseller to sell units in smaller quantities).
